OYSTERMEN DROWNED.

THE BODIES OF TWO COLORED MEN FOUND IN LANCASTER,

Their Skit Supposed to Have Sunk With 2 bem in Carter's Creek-Opposition to Mr. Fentress' Oyster Bill.

IRVINGTON, VA., Dec. 26.-Special .-The bodies of two colored men, members of the crew of an oyster boat, who have been missing since December 5th, were yesterday found at this place, in Carter's creek. They were last seen ashore here on the night of the 5th, starting out in a rickety skiff for their boat, anchored in the creek. As neither boat nor men were to be found the next day, it was believed they had shipped aboard one of the numerous oyster vessels then in the creek. No marks or bruises were upon their bodies, which were in a perfect state of preservation, and no con-clusion could be reached other than that the skiff had sunk with them, and neither being able to swim, lost their lives.

The oystermen of the Rappahannock

The oystermen of the Rappanamork strongly object to the bill proposed by Mr. Fentress, looking to the extension of the oyster season. It is, it is claimed, inimical to the propagation of the oyster, and the bright prospects in view for oyster culture will be seriously retarded. The shortening of the oyster season and strict observance of the cull law, such as has been fully carried out on the Rap-pahannock, has worked wonderful results in the quantity and quality of the oysters everywhere, certainly in this locality. The enormous increase in the revenue from the industry under the present law should caution our representatives to

'go slow" and leave "well enough" alone. The great question which has always stirred the agriculturist and other lands-men in the face here is where to set ef-ficient labor, is again bothering us. "Now, all such symptoms need to have prompt treatment. The attack must be met and repelled at once, or it is certain to run into something serious. I know of but one way to certainly avoid these troubles which are now so common, and that is, to immediately counteract them by using a good, pure, strong stimulant. Nothing of the ordinary kind, but something pure and scientific. For this purpose nothing has ever equalied Duffy's Pure Matt Whisky, which is acknowledged to-day by physicians and scientific people to be the only pure, medicinal mait whisky upon the market."

The words of the professor are true, and they carry a wonderful meaning to many men and women who are suffering with the first symptoms of grip, or else grip in its advanced stages. For all such people we oner a word of advice; which is to take the best means to overwhelm is to take the best means to overcome these troubles, and do not permit any dealer to swerve you from your purpose to have that which has proven itself by years of use to be the best and purest stimulant in the world. on the new schedule is to go into effect, 3,500 men employed all along the
road will quit work. This outcome o
the controversy was foreseen by the receivers as early as December 13th. They applied for and obtained, from Judge Jenkins, of the United States court of this city, an order authorizing and direct ing them to put into operation the new schedule of wages, and restraining the employes and their unions from combin-ing and conspiring to quit work, with or without notice service of the road, with the object of crippling or embarrassing its operation and generally from inter-fering with the officers or he agents of

the receivers, or their employes, in any manner by actual violence, intimidating threats or otherwise. This injunction was held back until to-day, the receiver having expected to arrive at an amicable agreement

The order of the Court restraining the Northern Pacific employes from "combining and conspiring to quit the service of the road" is an extraordinary document. It is the first order of its kind, it is said, ever hand in the United States. A somewhat similar injunction was issued by a United States Court in Michigan during the strike of the Toledo and Ann Arbor er, but that injunction was issued after the strike was in progress.

THE WILSON TARIFF BILL. It is Claimed That the Manufacturers Are Organizing to Defeat It,

The New York Herald, which favors the measure, claims that a large fund is being contributed by the manufacturers of this country to defeat the Wilson tariff bill.

larin bill.

In a long article on this subject the Herald of yesterday says: A large and growing fund to be used in the hope of defeating the Wilson tariff bill is being raised by manufacturers and others whose pecuniary interests are directly involved in tariff legislation. That money is being subscribed for such a purpose is already an open secret.

not, however, so clear. Opponents of the Wilson tariff measure talk freely on generalities, but will not tell what they will do with their money. That the supporters of any movement which has for its object the killing, or at least a material change in the pro-visions of the Wilson bill, are numerous and are spread throughout the country is admitted, and the fact that their ideas differ materially as to the proper means to be used to further their devices terfere with their giving their money

Governor Waite Issues a Call to the Legis-

faturs. DENVER, COL., Dec. 35. - Governor Waite has issued a call convening the Legislature in extraordinary session January 10th. The call is characteristic of sion will give the Legislature the best opportunity it eyer had to do something for Colorado.

Mass-meetings were held in this city and various towns and cities in the State at which strong resolutions were passed against the proposed action, and commit-tees of prominent men have daily visited the governor's office to protest against an extra session. The movement was strongly opposed in Governor Waite's home-town, Aspen, but to all appeals made the governor has given unsatisfacmade the governor has given unsatisfac-tory answers, and has indicated all along that he would convene the Legislature. DENVER, COL., Dec. 26.—The Denver newspapers unite in the demand that the Legislature shall immediately adjourn when it meets in special session, in ac-

cordance with Governor Watte's call.

DENVER, COL., Dec. 26.—The reasen
the Governor gives, as stated this evening, is that he heard that the State Committee of the People's parly was to meet to-day, and there were certain reasons why he should make public the call it advance of the meeting. The call is advance of the meeting. The call is made up of many topics, and his intent is to prevent the prompt adjournment

of the Legislature.

Governor Nichols is over hostile to the session. The impeachment talk has begun again, and further efforts will be made to find some good reason for this course. The influential men of the State of the Legislature to meet and promptly adjourn; but the fact that the Governor has included in the call a large number of bills that failed to become laws at the last session indicates that his hopes to thus secure support to his plan to keep the Legislature in session are not ill the Legislature in session are not ill founded. It is now predicted that the session will last fully sixty days.

The main difference between anthracite and bituminous coal is that the former is devote of volutile matter. Heretofure the theory generally accepted to account for this difference was that presented half a century ago by Professor Rodgers, while conducting the first geological survey of Pennsylvania.
